Direct Healthcare Professional Communication

22 February 2021

Chlorpromazine Elixir BP 25mg/5ml Oral Solution : Indications for the management of anxiety and tension states, agitation, depression, behavioural disturbances and subnormality.

Dear Healthcare Professional,

Pinewood Healthcare, would like to inform you that we have sourced an alternative unlicensed supply for Chlorpromazine. This will assist you in delivering continuity for your patients during the interim period, while we await production of our licensed product (PA0281/124/001) which will commence in early March. The estimated supply date is difficult to say but we hope to have the licensed product back on the market within a 6-8 week period from the 1st of March.

Highlighted below are three differentiations between both the Unlicensed and the Licensed version.

The unlicensed product contains Sunset Yellow E110 and is sucrose free, and it is packed in a 150ml bottle. The licensed product contains Tartrazine and sucrose and is packed in a 1Ltr bottle.

For further information a summary of the product characteristics (SmPC) can be obtained by following the link below.

https://www.medicines.org.uk/emc/product/4558/smpc#gref

In the event of any adverse reactions please see below.

Call for reporting

Healthcare Professionals are asked to report any suspected adverse reactions via HPRA, Pharmacovigilance, Earlfort Terrace, IRL Dublin 2 ;

Tel : +353 1 6764971 ; Fax : + 353 1 6762517

Website : www.hpra.ie ; email : medsafety@hpra.ie

When reporting please provide as much information as possible, including information about medical history, any concomitant medication, onset, treatment dates and product brand name.

Company contact point
