

Gamanil 70mg Film Coated Tablets (lofepramine)4x14 (PA 1701/004/001)

Expected market shortage

To Whom it May Concern,

We regret to inform you that the product Gamanil 70mg TAB 4x14, of which Zenitva k.s. is the Market Authorization Holder, will be facing market shortage.

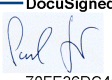

The shortage is expected to occur from the end of February 2024 when the current stock in the market will expire. We will continue to release stock until 2 months before this date.

The product is currently being transferred to a new manufacturing site that should give us more consistent and flexible supply the Irish market in the future. This is impacting product supply to all of Europe in equal measure.

We expect stock from the new manufacturing site to be available in the Irish market by September 2024.

We expect this situation to be rather exceptional. We are working hard to minimize the impact of this shortage on the Irish market.

Best Regards
