

Webinar Q&A -19 May 2022

Union Product Database

Question 1

Does the HPRA have an estimated timeline to address the remaining products to be added to UPD?

Answer

The outstanding products for uploading require data updates by the RMS before we can upload our data via the API. If this is still an issue by the end of June, we will look to including as a manual task in our ongoing data quality project over the summer months.

In the meantime, MAH's can contact us if there is missing product data and we will action these requests as a matter of urgency.
