NOTES:
An antigen designated with a 'w' represent a weakened expression of the antigen that may or may not react with all examples of the corresponding antibody.

TC: The Diego system antigen Di^b is a high incidence antigen in all populations studied. Its antithetical partner, Di^a, is extremely rare in Caucasians, although it occurs more frequently in populations of Mongolian extract. Anti-Di^a has been reported to cause hemolytic disease of the newborn and transfusion reactions. Ref: Race RR, Sanger R. Blood groups in man. 6th ed. Oxford: Blackwell Scientific, 1975:372-8.
