**12<sup>th</sup> September 2016**

Dear Customer,

this is a follow up to the Field Safety Notice dated 2<sup>nd</sup> September 2016.

### **Details of affected devices:**

Compared to the initial Field Safety Notice dated 2nd September 2016, the list of affected products has changed. Please find below in Table 1 a list of products that have been removed from our original Notice. We can confirm that these products are not affected as they have different packaging (Tyvek®) and were included in error in the original Field Safety Notice.

Klerpack BD Syringe Multi Packs, affected product SKU's and lot numbers see are listed in Table 2 in this letter.

### **Description of the problem:**

Internal testing has identified that the sterile packaging may contain small holes in the film of the pouch. If holes are present, the package integrity is compromised and there is a risk that the syringe may no longer be sterile.

Please complete and return the enclosed response form by either fax or email as soon as possible, but **no later than 30<sup>th</sup> September 2016**.
