ALERT CARD**

**Please
carry this card
with you at all times**

Other information (please complete):

Your name:

Date Voriconazole Teva first prescribed:

Treating doctor's name:

Treatment centre name:

Treatment centre phone number:

You should avoid exposure to direct sunlight during Voriconazole Teva treatment.

It is important to cover sun-exposed areas of skin and use sufficient sunscreen with high sun protection factor (SPF), as an increased sensitivity of skin to the sun's UV rays can occur. There is a small chance that skin cancer could develop over time.

You should contact your doctor immediately if you experience:

Sunburn or severe skin reaction following exposure to light or sun, e.g. severe skin rash or blisters.

Please ensure you undergo all follow-up visits for blood tests or skin evaluations arranged by your doctor.

Please have a list of all your other medicines and medical conditions available at each visit to a healthcare professional.
