Storage and ingredients

Each medicated verruca plaster contains 6.5mg of Salicylic Acid.
Also contains Microcrystalline Wax and Hydrogenated Vegetable Oil.
Store in the original packaging at less than 25°C, away from direct sources of heat and humidity.

Keep out of the reach and sight of children.

Carnation Vericap Verruca Treatment

Salicylic Acid 10% w/w

Vericap medicated plasters contain a Salicylic Acid paste that helps to remove verrucas while a felt ring relieves pressure.

Recommended for

the removal of verrucas.

Caution

For external use on the feet only.
Do not use:-

- if you are diabetic
- if you have a circulatory disorder
- if skin close to the verruca is inflamed or broken
- if you are using any other medicated product to treat your verruca
- to treat more than 3 verrucas at a time
- for any other purpose than the removal of verrucas
- on moles, birthmarks, hairy or genital warts, the face or anogenital skin
- if you are allergic to Salicylic Acid, NSAIDs (asprin), adhesive plasters or any of the ingredients
- on children under 6 or adults over 50
- after the expiry date shown on this carton and inner sachets
- if you are pregnant or breast feeding

Date of Information March 2021
P.A. No. 23188/1/3
Carnation is a registered trade mark.

Directions for Use

1. For better adhesion clean and dry the feet.
2. Take a medicated plaster from its sachet and remove the backing paper.
3. Firmly apply the medicated plaster, ensuring that the paste is over the verruca.
4. Change the medicated plaster every two days, cleaning the surrounding area and gently removing any dead skin. Repeat this treatment until all 4 medicated plasters have been used over an 8 day period.
5. When the 4th medicated plaster has been removed, cover the area with the protective plaster to allow healing and prevent infection.

Wait for 4 weeks before repeating treatment if the verruca has not disappeared.
Do not exceed recommended dose.

Possible Side Effects

While using this product a mild degree of soreness may be experienced, especially if the verruca is on a weight bearing area of the foot.
Occasionally local irritation or dermatitis (skin rash) may occur. If this happens remove the plaster, clean and dry the area and cover with the protective plaster. Do not repeat treatment.
If symptoms persist or you experience any unwanted effects consult your pharmacist or doctor.
This includes any possible side effects not listed on this pack. You can also report side effects directly via: www.hpra.ie
