Remember

KEYTRUDA® (pembrolizumab) is a type of therapy that works by helping your immune system fight your cancer. This type of therapy can sometimes have side effects.

With pembrolizumab, certain side effects can occur that may be serious and may happen anytime during treatment or even after your treatment has ended.

Contact your doctor right away if you experience any side effects. This includes any possible side effects not listed in the package leaflet.

Speak with your doctor if you have any questions about pembrolizumab or how it works.

Important Risk Minimisation Information for Patients

Your Guide to KEYTRUDA® (pembrolizumab)

Information for Patients

If you get any side effects, talk to your doctor, pharmacist or nurse. This includes any possible side effects not listed in this leaflet.

You can also report side effects directly via HPRA Pharmacovigilance; Website: www.hpra.ie. By reporting side effects you can help provide more information on the safety of this medicine.

Introduction

Your doctor has prescribed KEYTRUDA® (pembrolizumab) to treat your cancer. Please refer to the Patient Leaflet to read what Keytruda is and what it is used for. This brochure will serve as a guide to your treatment, including what to expect while you are taking pembrolizumab.

This guide will explain some of the side effects that might occur during or after treatment with pembrolizumab, and how to check for them. In some cases, symptoms may be delayed, and may develop after your last dose. You will also learn why it is important to report any symptoms to your doctor right away. Please read the Package Leaflet supplied with your medicine (and available from medicines.ie) as well as this guide, for additional information.

Doctor Stamp

About KEYTRUDA® (pembrolizumab)

Pembrolizumab is a medicine used to treat your cancer.

Treatment with pembrolizumab may have side effects. Pembrolizumab is a type of therapy that works by helping your immune system fight your cancer.

Before you start pembrolizumab

Tell your doctor about any medicines you are taking, have recently taken, or might take.

Make sure your doctor knows if you:

- Have an autoimmune disease (a condition where the body attacks its own cells).
- Have pneumonia or inflammation of the lungs (called pneumonitis).
- Were previously given ipilimumab, another medicine for treating a selected type of cancer, and experienced serious side effects because of that medicine.
- Had an allergic reaction to other monoclonal antibody therapies.
- Have or have had chronic viral infection of the liver, including hepatitis B (HBV) or hepatitis C (HCV).
- Have human immunodeficiency virus (HIV) infection or acquired immune deficiency syndrome (AIDS).
- Have liver damage.
- Have kidney damage.
- Have had a solid organ transplant or a bone marrow (stem cell) transplant that used donor stem cells (allogeneic).
- Are taking other medicines that make your immune system weak. Examples of these may include corticosteroids, such as prednisone.
- Are taking, have recently taken, or might take any other medicines.
- Are pregnant, think you may be pregnant, or are planning to have a baby.
- Are a woman who could become pregnant, you must use adequate birth control while you are being treated with pembrolizumab and for at least 4 months after your last dose.
- Are breast-feeding or plan to breast-feed.

Watching for side effects

It is important to be aware of symptoms

Like all medicines, pembrolizumab can cause side effects, although not everyone gets them. When you take pembrolizumab, you can have some serious side effects. These side effects can sometimes become life-threatening and can lead to death. These side effects may happen anytime during treatment or even after your treatment has ended.

If you notice any symptoms while receiving KEYTRUDA® (pembrolizumab), you should talk to your doctor right away. Be aware that side effects may still occur after receiving your last dose of KEYTRUDA.

Certain medications, such as corticosteroids, may be used to prevent more severe complications and reduce your symptoms. Your doctor may delay or completely stop your treatment if your side effects are too severe.

Do not attempt to diagnose or treat side effects yourself.

What to do if symptoms occur when you are away from home

It is important that you contact your doctor whenever symptoms occur. **Always carry your Alert Card for KEYTRUDA** with your doctor's contact information so that he or she may be reached in case of emergency. The Alert Card contains important information about symptoms that need to be reported immediately to the doctor or nurse treating you while you are away from home. It also alerts other doctors that you are being treated with pembrolizumab.

Please contact your doctor if you have any questions about KEYTRUDA or how it works.

Carry your Alert Card for KEYTRUDA with you at all times.
