

25th November 2021

Dear Healthcare Professional,

Following discussions with the HPRA & Health Service Executive (HSE), we are writing to inform you about the current situation with regards to the following product: -

- **Adrenaline (Epinephrine) 1:1,000 Solution for Injection – PA0073/035/001**

The Irish licenced stock of Adrenaline (Epinephrine) 1:1,000 Solution for Injection has been exhausted due to an unusual and unprecedented increase in demand for this product. Therefore, we will be temporarily out of stock for this product until the end of Feb 2022. ADVANZ is currently working with the manufacturer to improve the next delivery date and will inform the market on any change to the availability of licensed stock.

ADVANZ PHARMA is the sole supplier for this molecule in this form in the Irish market. To enable us to continue supply of this product for our patients, ADVANZ PHARMA is working with Pharmasource to supply the Irish market with the Unlicensed Medicine (ULM) Adrenaline (Epinephrine) 1:1,000 Solution for Injection from the UK market, which will be available from the 25th November 2021.

ADVANZ Pharma will monitor the situation of the ULM supply and do our best to procure further supply if required until the Irish licenced Adrenaline (Epinephrine) 1:1,000 Solution for Injection will be available again.

The HPRA have been informed about the shortage and the short-term mitigation plan to cover the market with ULM product.

Should you require any additional information please do not hesitate to contact us.

Kind Regards,

Madeline Donnelly

Commercial Director Ireland
